Terminal Disclaimer

1. The terminal disclaimer filed on 2/12/2010 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Patent Number 7291836 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Information Disclosure Statement

2. The information disclosure statement filed 2/12/2010 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. Specifically, German Patent DE19631654 and the NPL authored by M. Bergmann et al. have not had even an abstract provided in the English language. The examiner was able to procure an English language abstract for the German patent, and will provide it. However, she was unable to find an English language abstract for the NPL. Nor has any been received from the International Bureau. It has been placed in the application file, but the information referred to therein has not been considered.

Response to Arguments

3. Applicant's arguments, see "Remarks", filed 2/12/2010, with respect to the specification have been fully considered and are persuasive. The objection of the specification has been withdrawn in light of the provided amendments.

4. Applicant's arguments, see "Remarks", filed 2/12/2010, with respect to claims 4-11 have been fully considered and are persuasive. The objection of claims 4-11 has

been withdrawn in light of the supplied amendments correcting the multiple dependency issues.

5. Applicant's arguments, see "Remarks", filed 2/12/2010, with respect to claims 1, 3-4 and 6-12 have been fully considered and are persuasive. The ODP rejections of claims 1, 3-4 and 6-12 has been withdrawn in light of the supplied Terminal Disclaimer.

6. Applicant's arguments, see "Remarks", filed 2/12/2010, with respect to claims 1-3 and 12-13 have been fully considered and are persuasive. The 35 USC 103(a) rejections of claims 1-3 and 12-13 have been withdrawn.

7. Please note that the drawings filed 9/1/2006 have been accepted.

Allowable Subject Matter

8. Claims 1-17 are allowed.

9. The following is an examiner's statement of reasons for allowance:

10. In regards to claims 1 and 12, although Fritzsche et al. (U.S. Patent Number 4048497, from hereinafter "Fritzsche") does teach introducing a radioactive tracer to the oil of an internal combustion engine to determine the oil consumption (columns 1-3), Fritzsche fails to teach retaining a portion of the oil in an oil trapping device wherein the radioactivity is measured from the oil retained in the oil trapping device. Though Vitale et al. (U.S. Patent Number 6294389, from hereinafter "Vitale") teaches introducing a radioactive tracer to the oil of an internal combustion engine to determine the oil consumption (see, i.e., abstract), Vitale fails to teach retaining a portion of the oil in an oil trapping device wherein the radioactivity is measured from the oil retained in the oil

trapping device. Claims 2-11 and 13-17 are allowed by virtue of their dependency on the allowed claims 1 and 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. WO 98/05854 to Kampichler et al., which contains an English language abstract corresponding to DE1963164.
